

Please DO NOT allow the Internet Broadband Over Power Lines to be developed UNTIL ABSOLUTELY NO INTERFERENCE TO AMATEUR RADIO OR SHORTWAVE RADIO CAN BE GUARANTEED. Please conduct all necessary testing and require any filtration necessary to prevent interference by B.O.P.L. to Amateur Radio or the Shortwave services. Also please take enforcement action on any violators who interfere with Amateur Radio with B.O.P.L. We already contend with interference from unlicensed services as it is. Ham Radio's future is at stake here. The Amateur service should not be forced out by corporate GREED. Best Regards, M. Todd Miskel, KD7EFQ.
